IL NOSTRO OBIETTIVO È LA CREAZIONE DI MOBILI UNICI CON FINITURE DI PREGIO, REALIZZATI CON MATERIALI DI QUALITÀ ECCELLENTE.

Lo studio interno di progettazione e l'utilizzo delle tecnologie più avanzate ci permettono di seguire il progetto in tutte le sue fasi e di garantire la cura di ogni minimo dettaglio allo scopo di soddisfare tutte le esigenze della Clientela. La nostra produzione non si limita agli articoli di serie proposti in catalogo ma siamo in grado di interpretare e garantire lo sviluppo di ogni vostra idea gestendola fin dalla sua progettazione e realizzandola utilizzando la più vasta scelta di materiali.

La conservazione di un'artigianalità tutta italiana ci permette di realizzare un prodotto interamente Made in Italy che coniuga natura, tradizione, design e tecnologia per creare mobili unici, con carattere e anima.

Our goal is the creation of a unique furniture with strength finishes, made with excellent quality materials.

The internal design studio and the use of the most advanced technologies allow us to follow the project in all its phases and to guarantee the care of every minimum detail in order to satisfy all customer needs.

Our production is not limited to the standard items in the catalogue but we are able to develop any idea, managing it from the design to the project implementation, using the widest choice of materials.

The preservation of an entirely Italian craftsmanship allows us to make a 100% Made in Italy product that combines nature, tradition, design and technology to create unique furniture, with character and soul.

Notre objectif est la création de meubles uniques avec des finitions de prestige, fabriqués avec des matériaux d'excellente qualité.

Le studio de design interne et l'utilisation des technologies, les plus avancées, nous permettent de suivre le projet dans toutes ses phases et de garantir l'attention au moindre détail afin de satisfaire tous les besoins de la clientèle.

Notre production ne se limite pas aux articles standard proposés dans le catalogue. Nous sommes en mesure d'interpréter et de garantir le développement de toutes vos idées, de les gérer à partir de leur conception et de les réaliser en utilisant le plus grand choix de matériaux.

La préservation d'un savoir-faire entièrement italien nous permet de créer un produit entièrement "Made in Italy" qui combine nature, tradition, design et technologie pour créer un mobilier unique, avec du caractère et de l'âme.

CONSIGLI UTILI PER LA MANUTENZIONE DEL TAVOLO IN LEGNO MASSELLO

USEFUL TIPS FOR THE MAINTENANCE OF THE SOLID WOOD TABLE
CONSEILS UTILES POUR L'ENTRETIEN DE LA TABLE EN BOIS MASSIF

LONTANO DA FONTI DI CALORE

Mantenere il tavolo ad almeno un metro dalle fonti di calore dirette facendo particolare attenzione in caso di riscaldamento a pavimento;

FAR FROM HEAT SOURCES

Keep the table at least 1 meter far from direct heat sources, with particular attention in case of floor heating;

LOIN DE SOURCES DE CHALEUR

Garder la table à une distance d'au moins 1 mètre des sources de chaleur directes, en accordant une attention particulière en cas de chauffage au sol;

AMBIENTE TEMPERATO

L'umidità dell'aria in cui si trova il tavolo in legno massello deve oscillare tra il 50-55% a temperatura di circa 15-20°C. Mantenere il tavolo in un ambiente temperato senza sottoporlo a sbalzi di temperatura e/o umidità (il legno in condizioni di forte umidità tende a dilatarsi, mentre quando l'umidità relativa dell'aria scende, il legno tende a restringersi e fessurarsi);

MILD ENVIRONMENT

The air humidity in which the solid wood table is located must fluctuate between 50-55% at a temperature of about 15-20 °C. The table must not be subjected to thermal and/or humidity shock (wood in conditions of high humidity tends to dilate. When the air humidity drops, wood tends to shrink and cracking);

TEMPERATURE TEMPERE'

L'humidité de l'air dans laquelle se trouve la table en bois massif doit fluctuer entre 50-55% à une température d'environ 15-20 °C. La table ne doit pas être soumise à des chocs thermiques et/ou d'humidité (le bois dans des conditions de forte humidité a tendance à se dilater. Lorsque l'humidité de l'air baisse, le bois a tendance à se contracter et à se fissurer);

NO PRODOTTI A BASE ALCOLICA

Per la pulizia utilizzare uno straccio umido, senza prodotti a base alcolica, asciugando accuratamente subito dopo.

NO ALCOHOLIC PRODUCTS

For cleaning, use a damp cloth, without alcohol-based products, drying thoroughly afterwards;

PAS DE PRODUITS A BASE D'ALCOOL

Utiliser un chiffon humide pour le nettoyage, sans produits à base d'alcool et séchez soigneusement.

IL LEGNO DEVE RESPIRARE

Non coprire i piani dei tavoli con tovaglie sintetiche: il legno è materia viva ed ha bisogno di respirare;

WOOD NEEDS TO BREATHE

Don't cover the table top with synthetic tablecloths: wood needs to breathe;

LE BOIS A BESOIN DE RESPIRER

Ne pas couvrir le plateau de la table avec des nappes synthétiques : le bois a besoin de respirer ;

NO FONTI DI CALORE DIRETTE

Non appoggiare direttamente fonti di calore sui piani;

NO DIRECT HEAT SOURCES

Don't lay heat sources directly on the tabletop;

PAS DE SOURCES DE CHALEUR DIRECTES

Ne pas poser directement des sources de chaleur sur le plateau;

CERA D'API / OLIO

Con una finitura a vernice applicare ogni 6-12 mesi della cera d'api naturale e trasparente per un autonomo e semplice intervento preventivo, così da ravvivare, nutrire e proteggere il legno. Utilizzare dell'olio in caso di finitura a olio.

BEEWAX / OIL

With a varnish finishing, apply a natural and transparent beeswax every 6-12 months for an autonomous and simple preventive intervention, to revive, nourish and protect the wood. Use oil in case of oil finishing.

CIRE D'ABEILLES/HUILE

Avec une finition vernie, appliquez de la cire d'abeille naturelle et transparente tous les 6 à 12 mois pour un simple soin préventif, afin de rafraîchir, nourrir et protéger le bois. Utilisez de l'huile en cas de finition huilée.
